Market sector Commercial

Geographic sector Bath

GDL products

Sidewall linear bar grilles

Egg crates

4 way diffusers

Single deflection grilles

Air valves

Louvres

Double Deflection Grilles

Project details

The Gainsborough Hotel opened its doors in July 2015 after a highly anticipated wait, this is the first luxury five-star hotel in Bath in 30 years. The Gainsborough is the only hotel in Britain to have its own natural thermal spa complete with a bath house, four-storey glass atrium, saunas, steam rooms, an ice chamber, treatment rooms and fitness centre. The city of Bath is a Unesco World Heritage site and home to the unique hot, mineral rich water that bubbles deep beneath the ground. A borehole sinking 110m in the ground below the newly constructed Gainsborough Hotel supplies the private spa and bedrooms with clear geothermally heated water at 49°C, the water is believed to have medicinal qualities.

Project overview

The hotel has been formed from three existing buildings a Georgian, Elizabethan and Victorian building, two of which are listed buildings. The buildings, former hospitals and college classrooms have been derelict for almost a decade. The newly completed hotel also has 99 bedrooms, a restaurant, private dining room and lobby lounge. Working alongside M&E contractors Finning UK, GDL supplied our Grilles, Louvres and Diffusers throughout the hotel and spa areas for both supply and extract ventilation.

Benefits of using GDL Products on the project

- Our ventilation products are manufactured to the highest quality to suit any specific requirements.
- Our products offer excellent functionality and an aesthetically attractive finish.
