Project details

The Nadler, Covent Garden is the 'Affordable' hotel offering from the Nadler group, which joins venues in Kensington, Soho, Liverpool and Victoria. This former five storey office block on the corner of Strand and Bedford Street needed significant input at a very early stage from Westminster Council and local businesses to minimise the impact of the hotel construction on the hectic Covent Garden area. This 57 bed hotel needed extensive remodelling and extension of the existing buildings to achieve the required aesthetic including detailed repair of the historic façade. The hotel interior was restored to a very high specification.

Project overview

Working in conjunction with Blenheim House Construction GDL manufactured and supplied Clip On Screen Louvres and single and double Louvre Doors throughout the hotel, designed to meet the desired aesthetics of the building. Our Louvre range offers excellent functionality, rain defence and aerodynamic performance.

Benefits of using GDL Products on the project

- We offer a full turnkey package from design and manufacture to delivery and installation. We also offer an in-house design team for bespoke system requirements.
- Our specialist manufacturing capability means we have 100% control over the quality of our products and lead times.
